## Javelin J2xxi Driver & Firmware Update

Thank you for purchasing a Javelin i-Series card printer

This document contains known issues and late breaking news related to this latest version of our software and products as of Mar 26, 2014.

### Supported Configurations (V 2.0.0.5)

The release of this driver is intended for installation and use with the following Microsoft operating systems:

Windows® 2000  
Windows® XP  
Windows Server® 2003  
Windows Server® 2008 (32-bit/64-bit)  
Windows Vista® (32-bit/64-bit)  
Windows 7 (32-bit/64-bit)  
Windows 8

This new driver version is a common driver for J2xxi printer models. This release of the driver is intended for installation and use with the following Javelin Card Printers:

Printer models	Minimum firmware revision	Notes
J200i, J230i	V2.31	Includes USB and Ethernet models
** Use of any previous firmware version with this driver version may cause the printer to not operate correctly.		

If your printer type is NOT listed above, this version of our driver is not intended for use with your printer. If your printer is listed above, but the firmware is not equal to or higher than the minimum revision listed above, please visit our web site to download and install the latest version.
